

CASES OF COVID-19 IN PROVINCIAL HOTSPOTS

New cases of COVID-19, in provincial “hotspots,” that surround the greater Peterborough area, continue to climb. Even more worrying is the “positive rate” of the tests taken which, in some areas is inching towards 5%. The chart below shows the active outbreaks in the Province as of yesterday.

It is imperative that, as we all experience pandemic fatigue, that we somehow become even more vigilant than we have been in the past. With holidays coming, we do not want to see many smaller “micro-spreader” events any more than we want super spreader scenarios.

IF YOU ARE PLANNING TO VISIT FAIRHAVEN IN THE IMMEDIATE OR SHORT TERM, PLEASE DO NOT TRAVEL TO, OR VISIT FROM ANY OF THE AREAS SHOWING THE GREATEST NEW CASE NUMBERS, INCLUDING:

- Greater Toronto Area (GTA)
- Peel Region
- York Region
- Ottawa

It is not just your health, or the health of your loved one, that is at stake; it is also the health of every Resident that lives at Fairhaven and every employee that works here. Thank you.

Active Outbreaks	Yesterday / Hier	7-day average / Moyenne de 7 jours
